Education

University of California, San Diego

- **Bachelor of Science, Computer Science -** Graduating 2018, GPA 3.51
- **Coursework:** Algorithms, Theory of Computation, Artificial Intelligence, Software Engineering

Experience

CSE Tutor, UCSD Computer Science and Engineering Department   Aug 2016 — Present

- Currently tutoring CSE 8B Computer Science and OOP II: Java, Fall 2016
- Tutored CSE 100 Advanced Data Structures, Summer 2016
- Addressed student questions regarding programming assignments during lab hours and online.
- Analyzed student code to pinpoint bugs and suggested debugging methods.
- Graded programming assignments and exams.

Relevant Projects

Fizzle

- Android application that helps users make drinks and find friends to share them with.
- Features Google Sign-in, recipe generating algorithm, and buddy finding swipe feature using Firebase for the backend.

WhoseChore

- Web application that helps housemates manage chore responsibilities using Ruby on Rails framework and PostgreSQL database.
- Implemented backend with relational database design involving users, groups, and admins.

Meaningful Memos

- iOS application where users log their good deeds and can view contributions made by other online users.
- Developed using Swift 3 on Xcode and syncs data to cloud storage using Firebase.

SensCalc

- JavaScript application that calculates mouse distance based on user settings and resolution.
- User can choose to calculate for the current screen resolution or for a 3D environment

Mancala Game

- Python application of the classic Mancala board game equipped with various AI opponents.
- Opponent has randomized heuristics for different sequencing outcomes.

Technical Skills

Languages: C++, C, Java, Python, Ruby, SQL, Swift, HTML, CSS, JavaScript, JQuery

Tools: Eclipse, Visual Studio, Android Studio, Xcode, git, GitHub, Firebase
